NOTABLE TECHNICAL INQUIRY

What UASs can carry out an autonomous unmanned maritime ISR mission?

The Defense Systems Information Analysis Center (DSIAC) was asked to search for UASs that perform ISR maritime missions. A set of parameters was given to DSIAC staff to limit the results, although this search was nonexhaustive and UASs that do not meet all parameters are included. READ MORE

UPCOMING WEBINAR

Current State and Future Directions of Composites Additive Manufacturing...
March 20, 2024
12:00 PM – 1:00 PM

Presenter(s): Dennis Butcher
Host: DSIAC

This webinar presentation contains CUI and is therefore limited to government and contractors only.

Continuous fiber composites printing offers an elegant means to generate complex shapes, reinforce parts by leveraging the inherent anisotropy of fiber deposition, and enable a manufacturing paradigm dominated by digital engineering and distributed production. However, these benefits are yet to be fully realized because of a host of design, material, processing, and integration challenges. READ MORE

Read the Latest State of the IACs Report for 2023

In FY 2023, the U.S. Department of Defense (DoD) Information Analysis Center (DoDIAC) delivered on its mission to reduce duplicative research, increase collaboration across the science and technology (S&T) ecosystem, and enable the DoD’s technological superiority. Our collaboration with... LEARN MORE

EVENTS

EWA Technical Conference and the Dixie Crow Symposium
March 24–27, 2024
Robins AFB, GA

Joint Aircraft Survivability Program (JASP) Model Users Meeting (JMUM) 2024
March 26–28, 2024
Laurel, MD

2024 Robins Requirements Symposium
March 28, 2024
Robins AFB, GA

Sea-Air-Space 2024
April 8–10, 2024
National Harbor, MD

2024 National Fire Control Symposium
April 15–18, 2024
Fort Walton Beach, FL

2024 Combined Light Armor Survivability Panel (CLASP)
April 23–24, 2024
Colorado Springs, CO

ARE YOU A SME?

If you are a contributing member of the information systems community and are willing to help others with your expertise, you are a subject matter expert (SME).

ABOUT TECHNICAL INQUIRIES (TIs)

WHAT IS THE TI RESEARCH SERVICE?
- FREE service conducted by technical analysts
- 4 hours of information research
- Response in 10 business days or less

WHO CAN SUBMIT A TI?
- U.S. government (federal, state, or local)
- Military personnel
- Contractors working on a government or military contract

WHY UTILIZE THE TI RESEARCH SERVICE?
- Get a head start on your technical questions or studies
- Discover hard-to-find information
- Find and connect with other subject matter experts in the field
- Reduce redundancy of efforts across the government

To submit a TI, go to https://dsiac.org/technical-inquiries

RECENT DSIAC TIs

- What sensors are available for wide field-of-view battlespace awareness?
- What work has been done to add sensors to sonobuoys for above-water detection?
- What U.S. Department of Defense/government investments are augmenting casting and forging industries?

RECENT CSIAC & HDIAC TIs

- What software/middleware creates virtual and constructive cyber effects in live, virtual, and constructive testing and training events?
- What is the military’s position on the required degree of artificial intelligence (AI) explainability for deploying AI-enabled weapon systems?
- Is there a way to detect and track chemical, biological, radiological, and nuclear contamination in a littoral/riverine environment?
