How do you define attrition-tolerant UASs? How is it defined between the different branches?

What operations need attrition-tolerant UASs or are currently using them (e.g., command and control; logistical resupply; intelligence, surveillance, and reconnaissance)?

Who are the key stakeholders and impact players for attrition-tolerant UASs in the DoD, - industry, and academia?

1. Name of organization and/or POC working in this area.
2. Systems/technologies being developed or already in use.
3. Summary research being done and/or cost information related to attrition tolerant UASs.
